

DIGITAL AND IT

Digital literacy has been described as “the ability to find, evaluate, utilize, share, and create content using information technologies and the Internet”. Basically, the levels of digital skills range from sending and receiving emails to being able to programme a video game. ONS describes digital skills as those that simply allow for the safe and competent use of the internet.

SCREEN SOUTH

“Working for STEM Learning, it remains one of the most challenging and enjoyable roles of my career. I am incredibly proud to be a STEM Ambassador role model, to volunteer, both as a Governor and a scientist, my experience and knowledge, inspiring young people to have a better understanding of the exciting world that Science and Technology **can offer.**”
